ALASKA 4-H SHOOTING SPORTS PROGRAM BEST PRACTICES

Best Practices

The use of magnetic pads or other forms of muzzle rests should be discouraged in the Alaska 4-H Shooting Sports Program due to the opposition to muzzle control practices. Pump and auto load shotguns should be carried unloaded, with actions open, with safeties on, and the muzzles up or down range as appropriate. Over and under shotguns are carried unloaded, with actions open, safeties on, and cradled over the forearm and oriented down range. Youth should only load a single round or two rounds as appropriate immediately following the previous shooter.

Carrying of concealed firearms while in the classroom or on the range is discouraged due the difficulties in muzzle control practices and ammunition control practices (introduction of live ammunition into the classroom where firearms may be present).
