Publication Date:	2008

Course Description:

This is a course in oral communication for graduate students in chemistry. The course will provide students with experience in the presentation of scientific data with an emphasis on defense of data and interpretation. Presentations may be based on either peer-reviewed journal publications or original

Course Goals:

Students who successfully complete this course will have an understanding of the principles of oral communication in science including accepted presentation techniques, listening skills, critical analysis of scientific research, participation in scientific discussions, and introduction of speakers. In addition, Chem-692 students are expected to successfully defend interpretations of the research results they present.

Course Policies:

Attendance:

Students are expected to attend class and actively participate. Attendance will be assessed using traditional methods throughout the course. Exceptions may occasionally be made to accommodate

Speaking Lab: Students are strongly encouraged to make use of the Speaking Lab located in the Department of Communication Speaking Center (Gruening, Room 507). The Speaking Center is a student-oriented service provided to facilitate the preparation of public presentations. Students can obtain expert assistance in all aspects of public speaking, including assistance with organization, refinement, and delivery of their presentation. It is possible to record and watch a practice presentation together with a Speaking Center coach, who can offer constructive feedback. The Speaking Center is open to all students enrolled in an oral intensive course.
