

Approval of new ski trail south of the ASF antenna access route

UNIVERSITY OF ALASKA FAIRBANKS
MASTER PLANNING COMMITTEE (MPC)
MEMORANDUM

May 26, 2005

TO: Steve Jones
Chancellor

FROM: Richard A. Caulfield
Chair, UAF Master Planning Committee 2850

RE: MPC recommendation ~~054~~:
Approval of new ski trail south of the ASF antenna access route

At its regular meeting on May 26, 2005, the UAF Master Planning Committee unanimously approved the following recommendation (MPC ~~054~~) regarding construction of a new ski trail south of the access road into the ASF satellite dish on North Campus. A quorum was established; 12 MPC members were present.

The recommendation reads:

The UAF Master Planning Committee recommends design and construction of a new ski trail south of the existing access road into the ASF satellite antenna on North Campus, as presented at the MPC meeting on May 26, 2005. This recommendation is founded on the view that an ASF ~~fireman~~ requires access by a ladder truck from UAF Fire Department. Construction of the new trail will separate recreational uses from required vehicular access.

In approving this recommendation, the MPC expects that the rationale for this decision and the information on which it is based will be disseminated to the wider campus community. Our hope is that this new trail can be completed no later than the beginning of the ski season in fall 2005.

Approved by the MPC 10-0 (motion: Titus / second: Craven)

cc: MPC members
North Campus Subcommittee members
VCAS Neumayr
VCACE Poole
Facilities Services
Provost
