NEW OCCUPATIONAL ENDORSEMENT REQUEST ([UA Regulation 10.04.02](#))

Request ID: 9

These programs require students to go through a formal admissions process; the timing and fees for such processes will be under the purview of the MAUs. As such, a high school diploma or its equivalency is required—and the student is eligible for federal financial aid. Students are recognized by Banner to be in a specific program (as opposed to non-degree seeking or undeclared) allowing tracking of enrollment, progress and graduation. Students participate in a unit-level graduation ceremony and receive a MAU standardized "Occupational Endorsement."

Brief statement of the proposed endorsement, industry objectives and abbreviated student learning outcomes assessment and implementation plan:

Explanation of change in OE for resubmission

In the spring 2010 semester the proposed Facility Maintenance Occupation Endorsement was reviewed by the Academic Program Head and other personnel within the Construction Trades Technology (CTT) program. At that time it was recommended that two courses be removed from the required OE list due to lack of relevance to rural Alaska. The two courses in question were CTT 134 – Garbage Disposal Installation and CTT 136 – Landscaping and Horticulture.

After reviewing new construction and existing structures in rural Alaska, it was revealed there is a very low percentage of rural individuals that have garbage disposals or were in need of landscaping for their homes. Due to the lack of demand and practical application for these skills in rural Alaska, the CTT department determined that these courses should not be required to receive a Facility Maintenance Occupational Endorsement.

The Interior-Aleutians Campus and Construction Trades Technology Department felt strongly enough

participants in dealing with challenges unique to rural villages. Training will consist of identifying, troubleshooting, and customizing solutions to a building or home need. They will also learn the importance of working with community advocates; tracking and analyzing past maintenance trends; and developing strategies for future maintenance needs.
